

Ioxi-ty Rating Trajectory Report

Own data only: rapid and blitz improvement, milestones, volume, and current momentum

- Rapid: 2401 current / 2401 peak after 666 rated rapid games. All-time rapid gain: +669 from 1732.
- Blitz: 2403 current / 2403 peak after 2358 rated blitz games. All-time blitz gain: +981 from 1422.
- Rapid 2300 -> 2400 took 136 games and 228 days.
- Blitz 2300 -> 2400 took 739 games and 167 days.
- Main pattern: your online ratings move in bursts after study/OTB preparation blocks; rapid is the cleanest measurement format, while blitz supplies most of the reps.

Metric	Value
Rapid current	2401
Rapid peak	2401
Rapid games	666
Blitz current	2403
Blitz peak	2403
Blitz games	2358

All-Time Rating Trajectories

Rapid and blitz rating curves from rated Chess.com games

Rapid: sharp milestone bursts after preparation phases

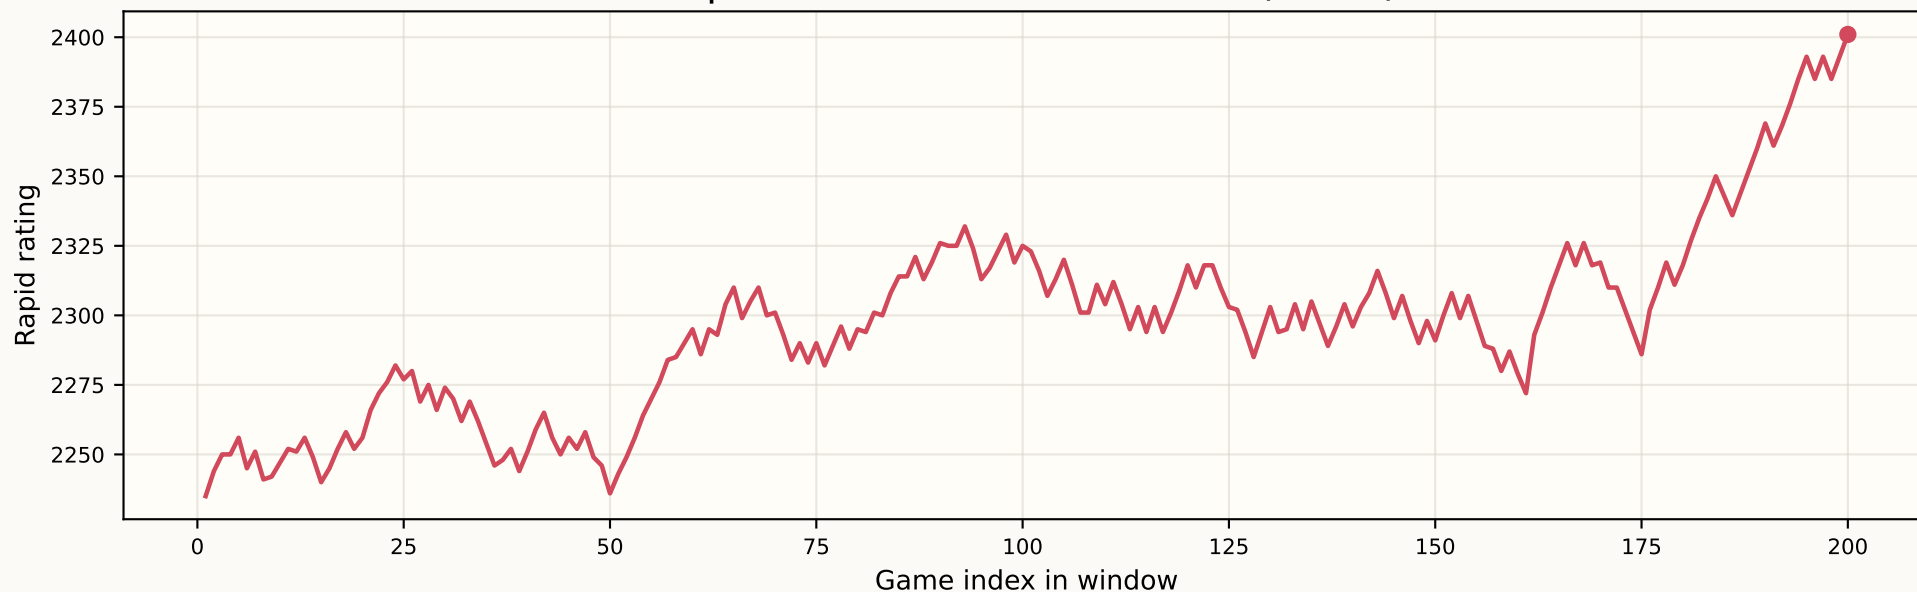

Blitz: high-volume pattern-recognition reps and 2400 peak

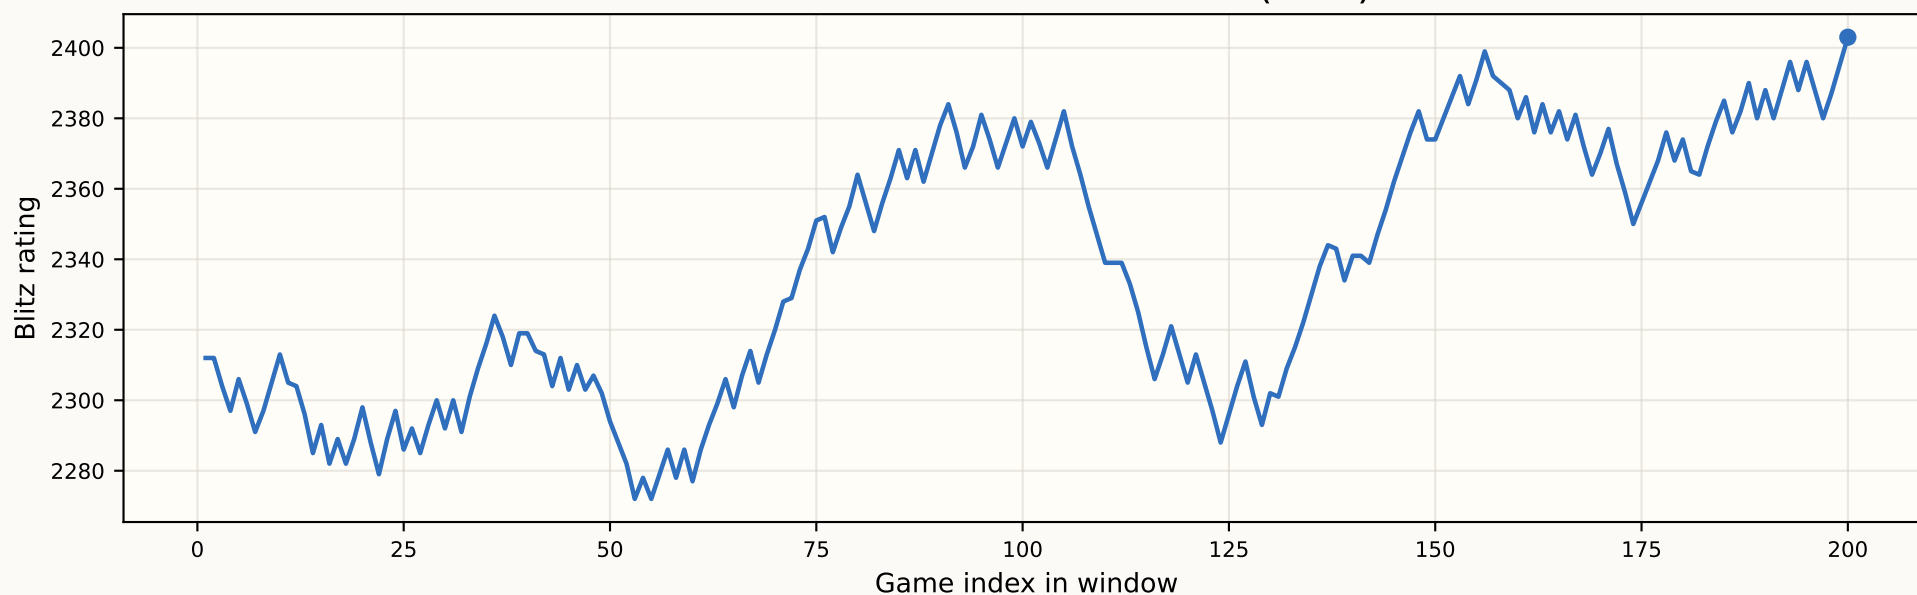

Recent Momentum

Last 200 games per format, where available

Rapid last 200: 2235 -> 2401 (+166)

Blitz last 200: 2312 -> 2403 (+91)

Performance Windows

Recent score, average opposition, and performance rating

Format	Window	Rating gain	Record	Score	Avg opp	PR
Rapid	Last 10	40	7-0-3	70.0%	2376	2523
Rapid	Last 25	99	19-0-6	76.0%	2353	2553
Rapid	Last 50	101	29-3-18	61.0%	2325	2402
Rapid	Last 100	78	50-8-42	54.0%	2311	2339
Rapid	Last 200	166	105-22-73	58.0%	2265	2321
Rapid	Last 500	444	272-42-186	58.6%	2169	2229
Blitz	Last 10	23	6-0-4	60.0%	2386	2456
Blitz	Last 25	41	16-1-8	66.0%	2348	2463
Blitz	Last 50	23	28-3-19	59.0%	2343	2406
Blitz	Last 100	24	51-10-39	56.0%	2330	2372
Blitz	Last 200	91	103-16-81	55.5%	2317	2355
Blitz	Last 500	112	249-36-215	53.4%	2317	2341

The rapid last-25 window is the standout: the 2400 push was a very high-performance burst, not just a slow grind. The last-50 rapid window is more sober and more useful as a stability check: it asks whether the 2400 level can become normal. Blitz is already at 2400, but the larger volume and noisier curve make it better as a training/reps signal than as the cleanest measure of deliberate improvement.

Milestones And Phase Speed

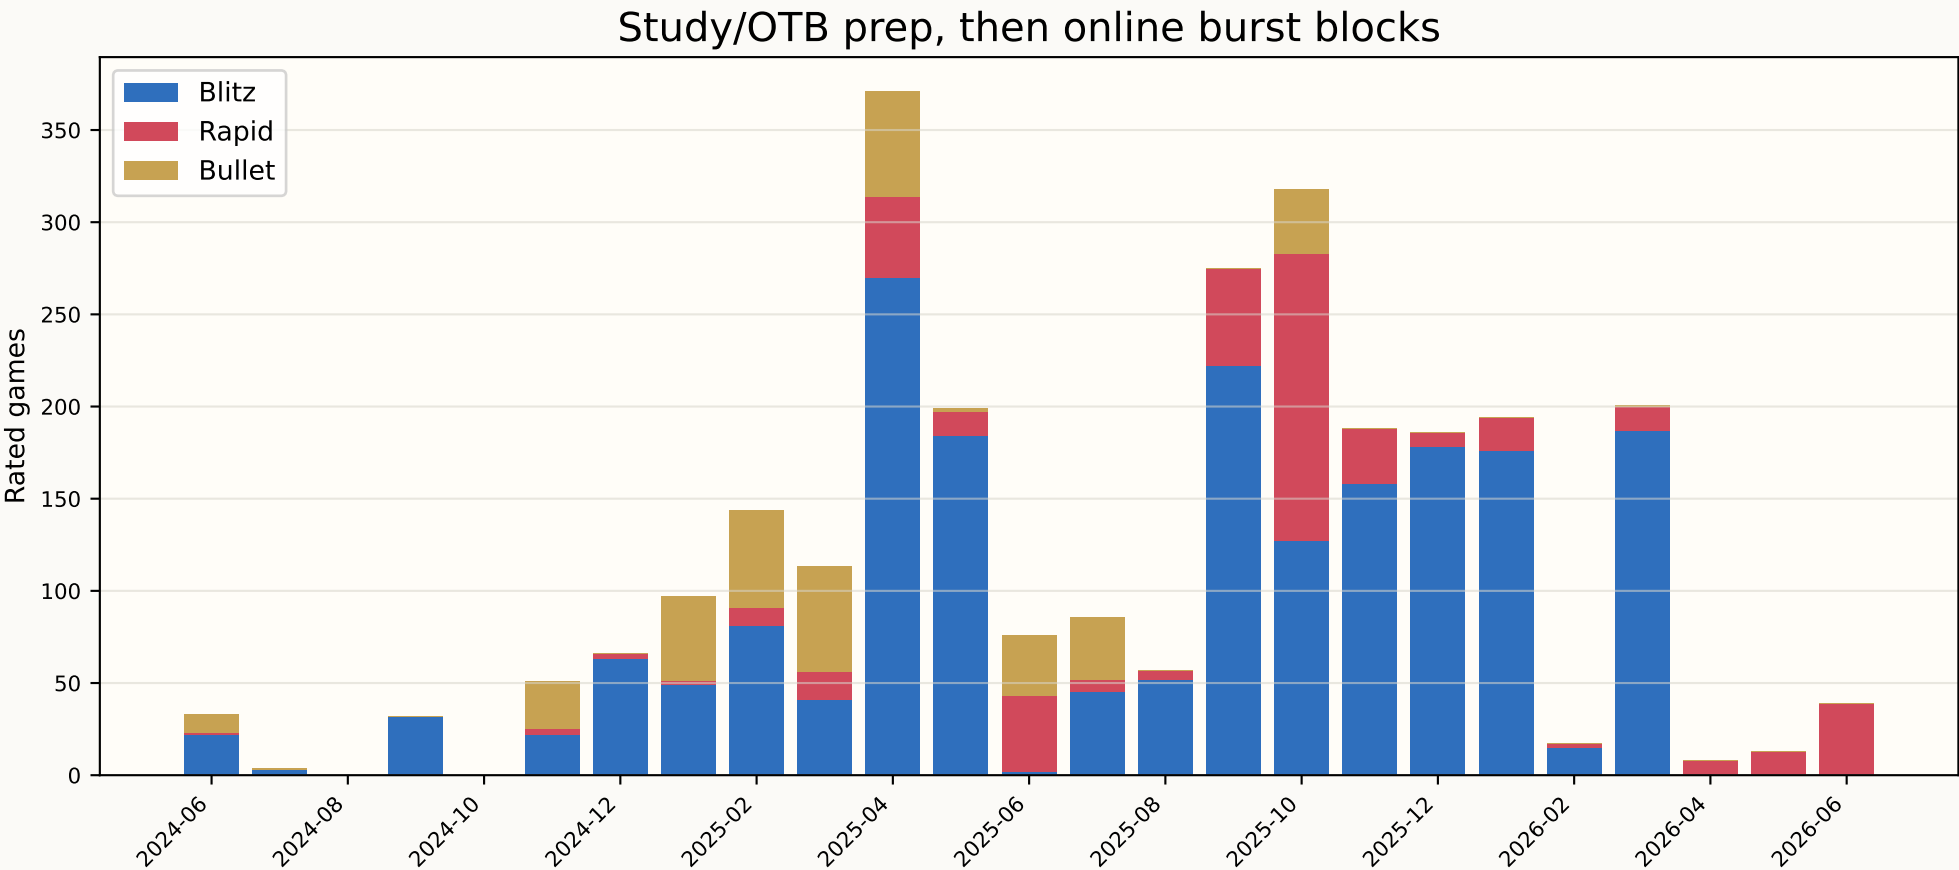

How many games and days each jump took

Milestone	Rapid date	Rapid game#	Blitz date	Blitz game#
1800	2023-03-26	101	2024-04-04	294
2000	2023-12-19	179	2025-01-15	618
2100	2025-03-08	214	2025-02-12	693
2200	2025-06-25	314	2025-05-19	1195
2300	2025-10-23	530	2025-10-07	1619
2400	2026-06-08	666	2026-03-24	2358
2500	-	-	-	-

Phase	Days	Games	Record	Score	PR
Rapid 2000->2200	554	135	77-9-50	59.9%	2127
Rapid 2200->2300	120	216	119-19-79	59.2%	2241
Rapid 2300->2400	228	136	70-12-55	55.5%	2335
Blitz 2000->2200	124	577	307-32-239	55.9%	2099
Blitz 2200->2300	141	424	226-31-168	56.8%	2237
Blitz 2300->2400	167	739	365-50-325	52.7%	2329

Two-Year Volume Pattern

Rated games from 2024-06-08 through 2026-06-08

Format	Games	Active days	Games/active day	Start	End	Gain
Rapid	484	109	4.4	1950	2401	451
Blitz	1929	164	11.8	1823	2403	580
Bullet	355	47	7.6	2022	2123	101

Monthly Rapid And Blitz Snapshot

Recent months show the burst pattern clearly

Month	Rapid games	Rapid end	Blitz games	Blitz end	Bullet games
2025-01	2	1994	49	2004	46
2025-02	10	2013	81	2102	53
2025-03	15	2107	41	2104	57
2025-04	44	2080	270	2105	57
2025-05	13	2099	184	2209	2
2025-06	41	2201	2	2209	33
2025-07	7	2200	45	2209	34
2025-08	5	2204	52	2204	0
2025-09	53	2203	222	2212	0
2025-10	156	2300	127	2241	35
2025-11	30	2319	158	2323	0
2025-12	8	2301	178	2322	0
2026-01	18	2303	176	2305	0
2026-02	2	2294	15	2296	0
2026-03	13	2296	187	2403	1
2026-04	8	2290	0	-	0
2026-05	13	2272	0	-	0
2026-06	39	2401	0	-	0

Condensed Takeaways

What your own curves say

1. Rapid is your cleanest benchmark

The rapid curve shows distinct rating-test bursts after preparation phases. Your 2300 -> 2400 segment was fast enough to be a real improvement signal.

2. Blitz is your reps engine

The blitz curve has far more games and likely contributes pattern recognition, but it is noisier. Treat blitz as training volume, not the sole truth about your strength.

3. Your study-cycle model is supported

The volume chart matches your description: lower online volume during study/OTB prep, then bursts where the online rating catches up.

4. Current risk

The danger after 2400 is rating protection or trying to force the next jump immediately. The next job is to make 2400 feel normal.

5. Next measurable target

Track the next 50-100 serious rapid games. If you can hold 2400-2450 while scoring plus against 2400-ish opposition, then 2500 becomes a live target rather than a dream number.
